

TAKE A RIDE. BE AMAZED.

You can read through sea trial reports and watch footage of the Seakeeper in action, but the only way to truly understand how this revolutionary technology will transform your operation is to experience it for yourself.

Visit www.seakeeper.com/takearide to schedule your demo today!

ELIMINATE BOAT ROLL.

**PROCEED WITH
CONFIDENCE**

SEAKEEPER HD
WHEN OTHERS STAY IN, YOU GO OUT.

Designed to handle the extreme conditions faced in extended offshore operations, the Seakeeper HD line provides added safety to crews and extends the amount of time you can be out on the water.

REDUCE RISK. KEEP THEM SAFE.

Boat roll jeopardizes the safety of everyone on board, whether by way of insecure footing, early fatigue, or moving loose equipment. With the push of a button, you can give your crew a land-like experience, greatly reducing the possibility of injury from slips and falling gear.

SPEED & EFFICIENCY

Furthermore, Seakeeper offers increased safety for your vessel. The completely internal system means there is no added drag or increased risk of snags.

ELIMINATE BOAT ROLL. YOUR CREW DESERVES IT.

STABILIZATION FOR ALL APPLICATIONS

One product, so many possibilities! Whether you're a patrol or crew transfer ship, a survey or research vessel, Seakeeper can smooth the seas and stabilize your platform. Whatever size your vessel may be, we've got a model that will do the trick without added drag.

Visit Seakeeper.com for installation photos and sea trial results on the wide range of Seakeeper stabilized boats.

WE AIM TO ELIMINATE UP TO 95% OF BOAT ROLL ON EVERY INSTALLATION

Making sure you have the highest level of stabilization while out on the water is important to us. That's why we look at every Seakeeper installation individually. We customize our product recommendation based on the parameters and use of your specific boat. To ensure our high standards have been met, we developed the Seakeeper Mobile App to record sea trials on our installations which has allowed us to create a database displaying the real-life results of hundreds of installations. View all of our sea trials at seakeeper.com.

AND JUST IN CASE YOU'RE WONDERING...

LIGHTWEIGHT

Seakeeper weighs a small fraction of the vessel displacement.

LOW POWER CONSUMPTION

Due to its vacuum encapsulation, Seakeeper requires minimal power. Select Seakeeper models even run off 12V DC power.

SIMPLE INSTALLATION

Completely internal, no external appendages.

FLEXIBLE

It can be installed virtually anywhere on the boat and any combination of units can be used to reach targeted performance.

25% OF SALES ARE REFITS

Easily refit our existing vessel with a Seakeeper unit.

OPTIMIZED

Seakeeper reviews every unique installation in-depth to ensure you receive the full Seakeeper experience. Seakeeper doesn't aim to simply reduce roll, we aim to eliminate it!

BUILT TO PERFORM

The Seakeeper is designed to virtually eliminate boat roll on vessels 27' and up. It requires modest electrical power, has no outside appendages, and can be installed off centerline, if necessary. Its computerized control and vacuum technology make it the first truly practical, and only modern, anti-roll gyro.

HOW IT WORKS

Inside a vacuum encapsulation, a flywheel spins at speeds of up to 9,700 rpm. When the boat rolls, the gyro tilts fore and aft (precesses), producing a powerful gyroscopic torque to port and starboard that counteracts the boat roll.

INNOVATIVE COOLING SYSTEM

Patented cooling system enables the flywheel to spin at high speeds inside of the vacuum containment.

VACUUM SEALED

Seakeeper's vacuum encapsulation enables the flywheel to spin roughly three times faster, cuts flywheel weight by two-thirds, and halves power requirements. Moreover, because the critical components (flywheel, bearings, and motor) are sealed in a vacuum, they are forever isolated from the marine environment.

ACTIVE CONTROL

Seakeeper's active control optimizes gyro torque, providing an unsurpassed level of performance. Unlike a passively controlled gyro, which must be turned off in the roughest conditions and/or at higher speeds, the Seakeeper is effective at all speeds and is used in all sea conditions.

DASHBOARD DISPLAY

Intuitive operator interface allows you to simply turn it on and forget about it. No complex settings or adjustments for the operator, Seakeeper does all of this automatically, you simply enjoy.

THE *HD* LINE

Heavy Duty. Engineered for extended use in the harsh conditions of offshore operations backed with the 4 year major component warranty.

DC POWERED UNITS

See our Recreational Line for battery-powered Seakeeper models ideal for boats approximately 27–39' long.

5*HD*

FOR BOATS ~35-44' (up to ~15 tons)
WEIGHT 870 lbs (395 kg)
DIMENSIONS 29.77 L x 29.71 W x 24.65 H (inches)
0.756 L x 0.755 W x 0.626 H (meters)

7*HD*

FOR BOATS ~45-54' (up to ~25 tons)
WEIGHT 1,210 lbs (550 kg)
DIMENSIONS 33.5 L x 35.6 W x 28.3 H (inches)
0.852 L x 0.903 W x 0.720 H (meters)

12*HD*

FOR BOATS ~55-64' (up to ~35 tons)
WEIGHT 2,195 lbs (996 kg)
DIMENSIONS 42.6 L x 43.2 W x 32.8 H (inches)
1.08 L x 1.1 W x 0.83 H (meters)

20*HD*

FOR BOATS ~65-74' (up to ~60 tons)
WEIGHT 2,960 lbs (1342 kg)
DIMENSIONS 52.7 L x 55.9 W x 40.4 H (inches)
1.34 L x 1.42 W x 1.03 H (meters)

30*HD*

FOR BOATS >75' (up to ~85 tons)
WEIGHT 3,920 lbs (1,778 kg)
DIMENSIONS 54.3 L x 55.9 W x 43.5 H (inches)
1.38 L x 1.42 W x 1.11 H (meters)

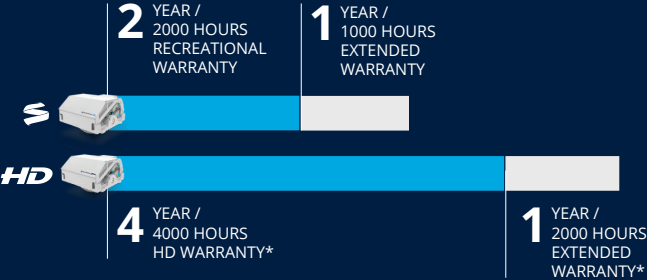

THE STATS

					
Rated Speed	8,100 RPM	7,000 RPM	4,600 RPM	3,850 RPM	4,400 RPM
